HIST 105: WORLD CIVILIZATION I

COURSE OBJECTIVE: A broad and general understanding of the chief characteristics of human history in the pre-modern era. Emphasis will be placed on the institutions, values and interrelationships among and between peoples across the globe and the contributions of individual societies and civilizations to human history.

COURSE OUTLINE:

UNIT I: EARLY HUMAN HISTORY AND THE BIRTH OF CIVILIZATIONS
Topic 1: Early Human History
Topic 2: Social Values of Traditional Societies
Topic 3: Early Civilizations—Middle East and Africa
Topic 4: Early Civilizations—India and China
Topic 5: Early Civilizations—the Americas and Oceania

UNIT II: RISING CIVILIZATIONS: RISING EMPIRES
Topic 6: Unification of China
Topic 7: State, Society and the Quest for Salvation in India
Topic 8: The Empires of Persia
Topic 9: Ancient Greece and Rome

UNIT III: GLOBAL CULTURAL DIFFUSION
Topic 10: Cultural Diffusion along the Silk Roads
Topic 11: The Rise and Spread of Islam
Topic 12: The Growth and Spread of Civilization in Asia
Topic 13: The Growth and Spread of European Civilization

UNIT IV: GLOBAL CONNECTIONS—EURASIA, THE PACIFIC AND THE ATLANTIC WORLDS
Topic 14: Inner Eurasia and the Mongol Empire
Topic 15: Pre-Modern Africa
Topic 16: Worlds Apart—the Americas and Oceania
Topic 17: Cross-Cultural Interactions and the Columbian Exchange

COURSE REQUIREMENTS

I. ATTENDANCE

Attend every class. Because the scope of the course is so broad and the content in many cases unfamiliar, and because the class does not duplicate the text, a missed session will be very difficult to make up. (If you cannot attend a particular class for a specific reason, be sure to attend a different section of the course during the week—except when Unit tests are being given). Attendance will be taken at each class and will be a component of the grading system.

II. THE POINT-COUNT SYSTEM OF EVALUATION

Students will achieve grades of A, B+, B, C+, C, D or F in the course by accumulating enough points for the grades listed below.

A. The total number of points available during the semester is 300. The minimum number of points required for each grade is:

- A = 270 points
- B+ = 260 points
- B = 240 points
- C+ = 230 points
- C = 210 points
- D = 180 points
- F = 179 points or fewer

Students taking the course on a Pass/Fail basis need to achieve 210 points to pass the course.

B. Points may be accumulated the following ways:

UNIT TESTS -- 150 points maximum

1. All students must take a test on each of the four Units in the course (see Course Calendar for dates). The professor will inform the class of the point value of each Unit test.
2. Students scoring less than 50% must see their professor immediately to discuss ways to improve their performance.
3. Tests must be taken in the order they are given—a test may not be taken until all previous Unit tests have been taken.
4. Students must take the Unit tests during their regularly scheduled class meeting, or earlier if necessary and with the permission of their professor.
5. Students who miss a test must (1) immediately contact their professor and then (2) see the Learning Assistant, Karen Sieben (History/Philosophy area, 224-2533) and schedule a make-up test as soon as possible. The make-up test must be taken within one week of the date the test was originally scheduled.
6. For best results on tests, see the section entitled “Studying for Unit Tests” later in the Syllabus.
7. In this course, **tests are not retaken**. Students who do not score well, and therefore do not earn many points, should plan to compensate by earning points in other ways.

8. Students must complete all of the Unit tests to receive any grade in the course.

9. Your professor may require an alternative activity to one of the tests.

**WRITING ASSIGNMENTS -- 50 points maximum**

1. Students will be assigned various types of written assignments for selected classes during the semester.
2. Refer to the Course Calendar for the due dates and point values.
3. These papers **must be typed** and properly stapled.
4. These papers will not be accepted late.
5. See “Preparing Written Assignments” later in the Syllabus.

**READING QUIZZES -- 50 points maximum**

1. At the very beginning of ten selected classes (see Course Calendar) students will have the opportunity to take a quiz on the **assigned readings** for those classes.
2. The professor will determine the format of these quizzes.
3. Reading quizzes are **not available** to students who are late for class or who miss class. There is no **make-up** available for quizzes.

**ADDITIONAL -- 20 points maximum**

The professor may use these points on tests, papers, quizzes or in any other way.

**CLASS PARTICIPATION -- 30 points maximum**

Student attendance and active participation will be evaluated by the professor at the end of the semester. (Your professor will provide you with details.)
III. MONITORING STUDENT PROGRESS

In accordance with college regulations, students will be monitored on a regular basis during the semester. (Your professor will provide you with details.)

It is the student's responsibility to keep track of their point accumulation in order to know where they stand in the course and to plan to meet the course requirements by the end of the semester. A Point-Count Record Sheet is provided for this purpose on the next page.

IV. INCOMPLETE

An Incomplete designation is available to students who are unable to complete the requirements for a D grade by the end of the semester. In order to qualify for Incomplete the student must:
1. Have already completed 140 points in the course,
2. Be able to achieve D in the course, and
3. Have the professor's approval and complete an application for Incomplete before the end of the semester.

*Your professor may assign more than one activity for each topic; use this space for those points where applicable. See Course Calendar for details. (You may not have an entry for each line.)
STUDY SUGGESTIONS

READING ASSIGNMENTS

1. In this course it is necessary to read all of the assigned materials—you can't get away with just reading one part or another. Tests as well as class discussion will utilize all of the assignments at one time or another.

2. The specific reading assignments can be found in the Syllabus or Course Calendar.
   (a) "TE" refers to the hardbound textbook and the assignments are by page number; the small letters indicate where on the page to stop or start reading (an "a" indicates the top half of the page, a "b" the bottom half.)
   (b) "RGH" refers to the paperbound reader and the assignments are by reading number, not by page number.

   [Your instructor may provide you with different reading assignments than those that appear in this syllabus.]

3. All the information you need to know for quizzes and written assignments will come from the assigned readings. Doing all the readings will enable you to accumulate as many points as possible.

4. Lectures will not duplicate the readings, but some overlap is unavoidable.

5. Be sure you read the assignments before coming to each class; quizzes, when they are given, will be based on these readings, not on what may have been covered in previous classes.

6. Always underline or mark up your books in a way that will be useful to you—this is especially true for material that is directly related to the Topic Outline in each Objective. Don't ignore maps, pictures or other subject matter included in the books—they often contain important information. (Be sure to put your name in the books so that they can be returned to you if lost or left behind in the classroom.)

7. Your professor will indicate to you which books it is desirable to bring to class—you will probably want to bring RGH to each class since it will be the basis of much of the discussion.

8. Ask questions about anything you do not understand—often that's the only way to learn.

9. Use a dictionary often—don't let a word you don't understand slip by.

TAKING NOTES IN CLASS

Taking good notes is absolutely essential in any class you take! But there are some rules you need to keep in mind to make your notes really valuable to you:

1. Pay attention. Do not allow yourself to be distracted or distract others.

2. Make sure you do your reading ahead of time so you don't have to duplicate your efforts.

3. Taking good notes involves something less than writing down everything and something more than writing down nothing. A few words here and there is never going to be adequate; neither is writing down only what appears on the blackboard.

4. Taking good notes is an art—especially the art of listening. Listen carefully for cues that the professor provides: Words like "most important," "vital," "crucial," "essential,"
etc. should set you to writing; so should the repetition, rephrasing or rewording of
generalities. Don’t get lost in too much detail.
5. You should probably come out of each class with at least two or three pages of notes.
6. Keep the Topic Outline handy, it will provide you with a framework for the material
covered in class. Some students work the outline right into their notes—a very useful
practice. Also, keep in mind the “Key Terms,” you’re sure to be responsible for them
on tests.
7. Go over your notes as soon as possible after each class. Since you may not be able to
get everything you want on the spot, you can fill in the missing information while it is
still fresh in your mind. Don’t count on remembering the information just in time to
study for the test—you won’t.
8. Feel free to tape the class if you wish, but understand this is not a substitute for good
note taking.

STUDENT RESPONSIBILITIES

1. Come to class on time or you will miss important material, quizzes, etc.
2. Do not leave the classroom until class is over or during the break—this is very
disruptive to other students and the professor.
3. Save your small talk until after class—you will not be permitted to distract others.
4. Respect your fellow students’ desire to learn and participate.
5. Do not make appointments that conflict with class.
6. Acquiring course materials, making up material from a missed class and scheduling
make-up tests are the student’s responsibilities.

[The By-Laws of the Board of Trustees, Section 1.3034(m), authorizes a
Student Conduct Code (College Regulation 6.3000R). You should be aware
that the Standards of Conduct specifically prohibit cheating or plagiarism in
connection with an academic program. The enforcement procedures regarding
the Student Conduct Code are fully explained in the Student Handbook. Any
questions concerning this should be directed either to your Student Development
Counselor or the Director of Student Life and Activities.]

APPROPRIATE USE OF TECHNOLOGY

1. All cell phones and beepers must be turned off during class time.
2. Students are not permitted to use I-pods or computers to play music during class
time.
3. During lecture or discussion, students are expected to use proper courtesy and refrain
from the use of technology.
4. “Chat” is not permitted during class. No text messaging
5. All e-mail must fully disclose the name of the student, course and section number.
6. Copying and pasting from the internet without reference or purchasing materials on
line and misrepresenting them as your own work is considered plagiarism and is in
violation of the Brookdale student conduct code. Doing so will result in grade changes
or even expulsion from the course at the discretion of the instructor.
PREPARING WRITTEN ASSIGNMENTS

Papers will be evaluated according to the following criteria:

1. The student must show evidence of having read all the relevant readings (text and RGH) for the topic. This will be evaluated by the presence of specific examples from the readings.
2. Students must show that they understand the meaning of the topic and its related issues.
3. Highest evaluations are awarded to those papers which indicate some degree of originality and obvious interest in the topic.
4. Neatness, good grammar and correct spelling are also taken into account.
5. Material copied from any source will not be accepted.

PREPARING FOR READING QUIZZES

The best preparation depends on conscientiously reading the assignment so that you will be able to provide the correct answers. Your professor will inform you of the format for the quizzes.

STUDYING FOR UNIT TESTS

Unit tests may include a variety of questions including:

Objective Questions: These will test your general knowledge of the material in the unit. Many will require some degree of thought, not just memorization. You can expect to find the usual multiple-choice, true-false, matching or fill-in-the-blank type of questions. You should know the “Key Terms” and the Topic Outlines very well.

Essay Questions: In this part you will be asked to provide analytical answers that will ask you to exercise some independent judgment. The essay section will usually include terms and longer essays.

Terms: This section will relate especially to the “Key Terms” section of the Topic Outlines.

1) If you are asked to identify/define a particular term or terms, the professor will expect a brief but complete paragraph (a few words or a sentence or two will not be adequate) fully explaining what or who the term is.

2) If you are asked to provide the historical significance/importance/impact of a term or terms, the professor will be evaluating your ability to explain why the term is important and the impact it had in the context of the Unit within which it was discussed. This will refer to how the term influenced the way people lived, thought, related to other people, changed history, etc. (Answers like “Such-and-such
is significant because people still think that way today" are not what
the professor is looking for, even if it is true.)

**Essays: Organization:** Your essays should be very well organized. Each essay
should begin with a paragraph which very briefly states your viewpoint on what the question asks. Next, you should provide an explanation that supports the opinion in the first paragraph. Last, you should provide a brief conclusion consistent with the body of your essay. Don’t just sit down and start writing.

**Facts:** Everybody has opinions, but the professor is interested in seeing that you can back up your opinions with facts you have learned in the course. (Your evaluation does not depend on your opinion, but your ability to support your opinion with facts.)

[Ask your professor as to the appropriate length of an essay.]

**Map Exercises:**

On some of the tests you may be given a map exercise to complete. Before the test, the professor will provide you with a list of places to locate on a practice map and a list of relevant maps in the text or RGH.

**Resources Available to Students to Prepare for Tests:**

1. Study groups.
2. Study-skills workshops.
3. Study guides.
4. In-class reviews.
5. Key Terms.
6. Learning Assistant for individualized tutoring.
7. Appointment with professor during office hours.
8. Publisher’s website—student study guide

**MAKE-UP TESTS**

Make-up tests are available to those students who do not take the regularly-scheduled test for whatever reason. However, they are not necessarily based on the same material the in-class tests are based on. The professor will feel free to ask questions on any part or aspect of the material in the unit—not just what the professor included in the review for the test. You should expect make-up tests to be more difficult than the regular tests.

Make-up tests should be scheduled with the Learning Assistant, Karen Sieben, at 224-2533.
(Remember, make-up tests must be completed within one week of the date the regular test was originally scheduled.)

**STATEMENT ON WRITING**

One of the most valuable skills you can acquire in college is the ability to communicate clearly and effectively. Such capabilities should not be restricted to a formal writing course, but must be a component of every course you take. Therefore, in addition to the history content, your professor will also correct spelling and grammatical mistakes (though your grade will not be affected by this).

In cases where students’ writing is clearly unsatisfactory, they will be referred to the Writing Laboratory in Larrison Hall.
DISABILITY STATEMENT

If you have a documented disability and would like to request accommodations and/or academic adjustments, contact the Disability Services Office (formerly Adaptive Services) at 224-2730 or TTY 842-4211.

HISTORY DEPARTMENT STUDENT SERVICES

Your World Civilization professors are committed to providing students with many types of assistance including:
1. Learning Assistant: Karen Sieben (first floor, MAN building) 224-2533
2. Department Web Site—through http://www.brookdale.cc.nj.us (no spaces)
3. Study groups—contact Learning Assistant for schedule.
4. Writing and Reading assistance: appropriate labs
5. Faculty Mailboxes are located in the central office area—first floor of MAN building.
6. Department secretary: Eileen Lengyel, 224-2534
7. Course materials are available in the department Learning Assistant’s area on the first floor of the MAN building
8. Faculty office hours can be found on a schedule posted on the faculty member’s office door in the History Department—first floor, MAN building.

CORE COMPETENCIES:

Communication
The student will communicate information and ideas clearly and effectively in all written and spoken forms, and will demonstrate effective listening and reading skills.

Critical Thinking
The student will think clearly, critically and creatively to analyze information, identify solutions, make logical decisions and solve problems.

Historical/Societal Analysis
The student will identify and analyze historical and/or societal issues as they impact current and future trends.

Community and Workplace
The student will demonstrate cultural sensitivity within the context of the contemporary, diverse, global community. The student will demonstrate ethical conduct and effective teamwork.
